Title of the paper

The title should be concise, informative and meaningful. It should include key terms to make it easier to be found via searching. Please avoid long systemic names, obscure abbreviations, acronyms or symbols or formulas. Avoid phrases such as “on the”, “a study of”, “research on”, “report on” “regarding”, and “use of”, omit “the” at the beginning of the title.

First Name Last Name¹, First Name Last Name² and First Name Last Name^{2,*}

¹ Department, Institution, City, Country

² Department, Institution, City, Country

Note: Please list all authors' full names and institutions. If an author's current address is different from the address where the work was carried out, please add note. The general note symbol should be used in the following order: *, †, ‡, §, ¶, **, ††, ‡‡. Author Contribution: we encourage authors to make specific attributions of contribution and responsibility in the acknowledgements of the article, otherwise all co-authors will be taken to share full responsibility for all of the paper. Authors may wish to use a taxonomy such as CRediT to describe the contributions of each author.

* Correspondence author(s); E-mail: E-mail1(s): XX.

Highlights:

Highlights are three to five bullet points that help increase the discoverability of your article via search engines. These bullet points should capture the novel results of your research as well as new methods that were used during the study (if any). Think of them as the “elevator pitch” of your article. Please include terms that you know your readers will be looking for online. Don't try to capture all ideas, concepts or conclusions as highlights are meant to be short: 85 characters or fewer, including spaces.

- Highlight 1
- Highlight 2
- ...

Abstract: Abstract is a brief summary of the article. The abstract determines the scope of paper. It should be concise, informative, self-contained. For a research paper, state the major problem or the purpose of the paper, indicate the methods used, summarize main results obtained and major conclusions. It should not include undefined acronyms/abbreviations and table numbers, figure numbers, references or equations or section number. Trial registration number should be included in the abstract if have. Normally, the abstract should be less than 300 words.

Copyright©Year by the authors. Published by ELSP. This work is licensed under a Creative Commons Attribution 4.0 International License, which permits unrestricted use, distribution, and reproduction in any medium provided the original work is properly cited.

Keywords: Please supply up to 10 keywords, main 3 or 4 key phrases and at least 3 or 4 additional key words to make it more discoverable in search engines like google, web of science.

1. Introduction

The introduction gives a concise and appropriate background of the problem under investigation, and the significance, scope and limits of the work. Outline what have done via citing pertinent references. State what your work differs from previous work. Please spell out those highly specialized terms and abbreviations used in the article to make it accessible for readers.

2. Methods

Sufficient details of the experiment, methods, simulation, calculation, statistical test or analysis should be given so that the method could be repeated by another researcher and the results reproduced. Note and emphasize any hazards such as explosive or toxicity, better with a separate section by the heading “Caution”. In theoretical papers, this section can be called “Theoretical Basis” or “Theoretical Calculations”.

3. Results

Summarize the data collected and the statistical treatment. Use equations, figures and tables for clarity and brevity. Extensive but relevant data should be included in the supporting information.

3.1. Equations

[add an equation here; use MS Word or MathType equation function] (1)

3.2. Tables

Table 1. Table Caption.

Title 1	Title 2	Title 3
entry 1	data ^a	data ^b
entry 2	data	data

^a Table footnotes should be given as superscript letters such as a, b *etc.*; ^b The footnotes should appear at the foot of the table.

3.3. Figures

Every figure must have a caption that includes figure numbers and a brief, informative description, preferably in non-sentence format. Text in the figure legend should be with same fronts (Times News Roman) and size (12pt). Figures should be numbered in the order in which they are referred to in the text, using sequential numerals (e.g. Figure 1, Figure 2, *etc.*). If there is more than one part to a figure (e.g. Figure 1a, Figure 1b, *etc.*), the parts should be identified by a lower-case letter in parentheses close

to or within the area of the figure. For figures copied from other publication, permission is needed. Please add references of the figure caption and put appropriate credit lines like: Reprinted with permission [1]. Copyright 2021 Elsevier.

Figure 1. Figure Caption 1 [1]. Reprinted with permission [1]. Copyright 2021 Elsevier.

3.4. Enumerate

3.4.1. Example

Bulletin examples

- (1) item one
- (2) item two
- (3) item three

another type:

- (1) item one
 - (a) sub item one
 - (b) sub item two

- (2) item two
- (3) item three

bullet type:

- item one
- item two
- item three

4. Conclusion

The purpose is to interpret and compare results and point out the features and limitation of the work. Relate the research to current knowledge in the field.

Supplementary data

The authors confirm that the supplementary data are available within this article.

Data availability statement

ELSP journals promote transparency, reproducibility, and replicability in research. Authors are required to include a Data Availability Statement (DAS) in all research articles, specifying where the data supporting

the findings can be accessed, including repository names, DOIs or URLs, and any access conditions. If no new data were generated or analyzed, or if the data cannot be shared due to privacy, ethical, or commercial restrictions, an explanatory statement is still required. Authors are encouraged to deposit data in trusted repositories and provide persistent identifiers and metadata to enable reproducibility, please visit here on how to deposit “Research data”: https://www.elsevier.com/about/editorial_policies.

Example statements:

- The data or datasets generated or analyzed in this study are available in [repository name] at [DOI or URL].
- The data or datasets that support the findings of this study are available from the corresponding author upon reasonable request. (Not preferred)
- No supplementary or additional data were generated in this study.
- The data that support the findings of this study are not publicly available due to [reason], but are available from the corresponding author upon reasonable request. (Not preferred)

Declaration of generative AI and AI-assisted technologies

Authors must disclose any use of generative AI or AI-assisted tools (such as large language models) in the preparation of this manuscript. Such tools are permitted only for language or copy editing purposes. Authors remain fully responsible for the integrity, originality, and accuracy of the content.

Example statements:

- The authors did not use generative AI or AI-assisted technologies in the writing of this manuscript;
- During the preparation of this manuscript, the authors used generative AI tools only to improve language and readability. Specifically, the authors used ChatGPT, Grammarly, *etc.* for language polishing only/for drafting/for rewriting/for idea development in limited sections/substantial portions/entire manuscript. The authors take full responsibility for the content of the manuscript.

Acknowledgments

Funding: All sources of financial support for the project **must** be disclosed in the acknowledgements section. The name of the funding agency and the grant number should be given, for example: This work was funded by the National Foundation of Science with grant number XXX. Author should fill the grant number information during the submission stage. Please make sure the grant number is correctly written.

Authors' contribution

Please make specific attributions of author contribution and responsibility in this part and follow CRediT to define the roles of co-authors. The following statements should be used “Conceptualization, X X and Y Y; methodology, X X; software, X X; validation, X X, Y Y and Z Z; formal analysis, X X; investigation, X X; resources, X X; data curation, X X; writing—original draft preparation, X X; writing—review and

editing, X X; visualization, X X; supervision, X X; project administration, X X; funding acquisition, Y Y. All authors have read and agreed to the published version of the manuscript.”.

Conflicts of interest

Authors are required to disclose any potential conflict(s) of interest like employment, consulting fees, research contracts, stock ownership, patent licenses, honoraria, advisory affiliations *etc.*

Ethical statement

For research involving human experiments, please add “The study was performed in accordance with the Declaration of Helsinki and approved by the name of the Ethics Committee or Institutional Review Board (approval date, and approval number must be included)”.

For research involving animal experiments, please add “The study was approved by the name of the Ethics Committee or Institutional Review Board (approval date, and approval number must be included)”.

If ethical approval is not required, authors must provide an exemption from the Ethics Committee or Institutional Review Board, or a detailed statement because approval is not required.

References

Direct quotations from another author’s work should be cited as footnote. For publications that are Accepted or submitted or in preparation, please just add a note at the end of the corresponding reference.

Journal Articles

Journal references must include the author names, abbreviated journal title, year of publication, volume (optional) and page range. For more than five authors, the name of the author should be given followed by *et al.* A collaborative group of authors or by a corporate body is accepted.

- [1] Saberi S, Kouhizadeh M, Sarkis J, Shen L. Blockchain technology and its relationships to sustainable supply chain management. *Int. J. Prod. Res.* 2019, 57(7):2117–2135.
- [2] Li T, Wang Z, Yang G, Cui Y, Chen Y, *et al.* Semi-selfish mining based on hidden Markov decision process. *Int. J. Intell.* 2021, 36(7):3596–3612.
- [3] Hu Y, Seneviratne S, Thilakarathna K, Kensuke F, Aruna S. Characterizing and detecting money laundering activities on the bitcoin network. *arXiv* 2019, arXiv:1912.12060.

Books and Book Chapters

Book references must include the author or the editor names, book title, publisher, city of the publisher and year of publication.

- [1] Copstead LE, Banasik JL. *Pathophysiology*, 3rd ed. St Louis: Elsevier, 2005. pp. 123–126.
- [2] Mount DW. Alignment of pairs of sequences. In *Bioinformatics: Sequence and Genome Analysis*, 2nd ed. New York: Cold Spring Harbor Laboratory Press, 2004. pp. 65–68.

Book Series

Book series that are periodicals but are not journals could be styled either as books or journals.

Author 1, Author 2, Author 3. Title; Editor 1, Editor 2, Eds. Series title. Place of Publication: Publisher, Year; Pagination.

[1] Copstead LE, Banasik JL. Lignocellulose Biodegradation; Saha BC, Hayashi K, Eds. *ACS Symposium Series* 889; Washington DC: ACS, 2004.

Conference Series

Conference series should include the title of the conference and the title of the series but not the publisher.

[1] Holstein BR. Title of the conferences. *J. Phys.: Conf. SeCode* 2009, 173, 012019.

Conference Proceedings

Conference proceedings should include the presented work and the conference proceeding title and the publisher.
